## Sketch 3 — Import & Parse

### Sketch 3 — Import & Parse

The sketch shows a mobile app interface with a white background and rounded corners. At the top, there is a black status bar. Below it, the interface consists of several rectangular buttons and a text input area, all centered horizontally. The buttons are arranged vertically: 'Add Material', 'Upload PDF | Paste Text', 'Extract Key Points', and 'Create Flashcards'. Between the 'Upload PDF | Paste Text' button and the 'Extract Key Points' button is a large text input area with the placeholder text 'Paste reading here...'. Below the 'Extract Key Points' button are three smaller buttons, each containing a bullet point followed by a text snippet: '• Definition: LTP...', '• Steps: Induction → Expression...', and '• Example: Hippocampus...'. The 'Create Flashcards' button is the final button at the bottom of the sequence.
